

ENVIRONMENTAL POLICY

Liker Motors Kft. is engaged in the production and repair of electric machines, its goal is to provide a reliable, exceptionally high-quality service tailored to the needs of its customers. While providing our services, we use our own vehicles both in Hungary and abroad.

Liker Motors Kft. is committed to continuously improving its environmental performance, preventing environmental pollution, and complying with relevant environmental legislation and other requirements. In order to realize the stated commitment, Liker Motors Kft.'s commitments are summarized in the following points:

- It assesses and evaluates the environmental factors associated with the activity, formulates and implements environmental goals in order to continuously reduce the significant factors.
- During the transport of dangerous goods, it considers the prevention of accidents to be of primary importance, and takes all technically and economically feasible steps to prevent environmental pollution.
- It strives to optimize the amount of generated waste and the consumption of resources, and to effectively manage emergency situations that may occur.
- It carries out its activities in compliance with environmental protection and other requirements.
- By applying the best available technology and suitable professionals, by planning the continuous training of employees, it ensures the fulfillment of its commitment to environmental protection;
- By monitoring and improving our environmental performance, we strive to certify and continuously improve our environmental management system according to ISO14001.
- Environmental protection and technical safety are the concern of all employees of the company.
- The duties of the management include creating the conditions for the protection of the environment during all activities of Liker Motors Kft.
